

# OUR SHARED FUTURE

## Gerald Eve Climate Change Commitment & Framework

### DECLARATION

The world is facing an unprecedented environmental challenge, with rising global temperature affecting weather patterns, livelihoods and species around the world.

Gerald Eve acknowledges that climate change is happening as a result of human factors and we accept that we must do what we can to change the way we operate our business to reduce our environmental impact.

Along with the UK Government and many Local Authorities across the country, we declare a climate emergency. In doing so, we recognise the severity of the challenge we face and the need for immediate, meaningful action.

Our Climate Change Commitment and Our Shared Future Framework set out how we intend to respond to this emergency.
